Professional Summary

Software developer passionate about expanding my skillset. Experience mainly consists of backend work using Spring Boot and HCL Commerce frameworks. I place high value in effective communication and efficiency.

Skills

Languages: Java, JSP, JavaScript, Typescript, Python, C++, C#, HTML, CSS, SQL

Frameworks: Spring Boot, HCL Commerce, ReactJS

Technologies & Tools: AWS, MySQL, Postman, Azure DevOps, Selenium, Cypress

Work Experience

Technical Consultant, Backend Developer

June 2022 - October 2024

Perficient Inc.

Client: Fortune 500 Construction Equipment Manufacturer

- Worked with four separate teams throughout tenure across varying areas of an E-Commerce parts site.
- Participated in development on a monolithic legacy application, leveraging technologies such as Spring Boot, HCL Commerce, JSP, and MySQL.
- Implemented novel functionality for users from various countries to shop with client's card payment system, allowing users to make purchases through a line of credit.
- Assisted with migration from SOLR to Lucidworks Fusion for Application's search API.
- Took part in creation of Spring Boot Microservices based on legacy code, along with writing Apigee contracts for newly created services as a part of modernization efforts.
- Took part in implementation of custom security Framework to address security concerns, adding additional protections to critical data.
- Assisted in research and adjustments in accordance with security assessment criteria in accordance with OWASP best practices, resulting in better protections for user data and vulnerability minimization.

Outbound Loader

Oct 2013 - May 2021

Sysco Wholesale Distribution

- Assisted other dock employees with any process issues as section's most senior employee.
- Secured products for safe shipment to customers.
- Regulated the staging of outgoing product at the proper locations for related routes.
- Check quality of outgoing products.
- Ensured departure times were met.

Supply Administration Specialist

Apr 2013 - Nov 2019

United States Marine Corps Reserve

- Tracked on hand equipment through GCSS system.
- Lead peers in accomplishing logistical goals on various projects.
- Acted as a mentor for junior Marines.
- Assisted with unit audits.
- Conducted gear issues and disposals.
